About This Content

Marvellous Monorails offers an all-new vehicle type to Cities in Motion 2. The monorail is a handy vehicle for innercity connections and works best in circular lines. The pack boasts five different monorail vehicles, from the slow but very large Toyoka Cybria City, to the super-fast but quite high maintenance Stern-Berger Mate.

An all new type of transportation! Monorails are a great choice for routes connecting different parts of the city. They are fast and attract a lot of passengers, and give your city a novelty look with their elevated rails. When a metro line is too expensive but you need a vehicle that is not affected by traffic, the monorail is your choice. Build circular lines for maximum efficiency and try all of the five different monorail vehicles to find just the right one for each line.

- **Ness Mono.** Ness Mono is a sure favourite among passengers. It's very comfortable to ride and also fairly fast, so people get to their destinations quick and enjoyably.
- **Hana-Bi Challenger.** Hana-Bi Challenger is very eco-friendly with its low energy consumption. It is also fairly attractive to passengers and quite sturdy, thus requiring less maintenance than most vehicles.
- **Toyoka Cybria City.** The Cybria City from Toyoka factories is very reliable, if somewhat slow and not the first choice of many passengers. For long routes with many stops, this trooper is a good option.
- **Capitol Palm.** The Palm is manufactured by Capitol factories. It's a fast, reliable vehicle, but not very energy

conservative. Due to its speed, it's excellent on longer routes with few stops.

- **Stern-Berger Mate.** When speed is what you want, Mate from Stern-Berger is your choice! Even though the Mate is small, it's very fast and attractive due to its modern design.

Title: Cities in Motion 2: Marvellous Monorails

Genre: Simulation, Strategy

Developer:

Colossal Order Ltd.

Publisher:

Paradox Interactive

Release Date: 9 Jan, 2014

b4d347fde0

Minimum:

OS: Microsoft Windows XP/Vista/7/8

Processor: 2 GHz Dual core

Memory: 3 GB RAM

Graphics: nVIDIA GeForce 8800, 512 MB RAM or ATI Radeon HD 3850, 512 MB RAM

DirectX: Version 9.0

Network: Broadband Internet connection

Storage: 2 GB available space

Additional Notes: Broadband Internet connection

English,German

Awesome! Works very Good. Love this Game!. Great for smaller towns and linking to main metro lines ! No traffic too !. How long we use the Monorail in this game? they are Marvellous!. Hours of interest and setting up transportation however need new maps or open to set up a new city and start transportation.

. A nice piece of DLC for a nasty price, just wait for a sale and pick it up for about \u00a32, as I did myself.

Definitely worth having in your transport arsenal. My only gripe is cosmetic regarding street lighting that clips through the platforms and rails. Otherwise, very glad I bought it :). Get it when it's on sale.

This pack adds the Monorail network to the game. Its incredible flexibility means you can weave it through buildings in a dense city with ease.

People keep comparing it to Metro, but they forget that while the largest train does have just over half the capacity, track is 1 Currency Unit cheaper per track per metre at the same height, the biggest Monorail train is half the cost of the smallest Metro train, uses less than half the electricity and requires less than half maintenance.

If you use it right, Monorail is a money-making machine. If you use it wrong, it'll lock up and decimate your passenger ratings. It's Tram with most of the flexibility of Metro.

But the pack is overpriced and these are the only five Monorail trains on offer. Two of which are even carried over from Cities in Motion's Tokyo expansion. Get it on a sale.
